## **TREATMENT INSPECTION REPORT GUIDELINES**

### **GENERAL**

The following information is the minimum requirements for the inspection report prepared by the approved treatment inspection agencies as listed in Appendix A. The treatment inspection agency shall furnish an inspection report for each charge of material inspected. The inspection report shall include a certification statement in which the treatment inspection agency certifies that the material has been inspected according to the appropriate AWPAs Standards. In addition, the certification statement from the treatment inspection agency shall clearly express that the material has been inspected and it complies with the applicable Iowa DOT Specifications.

### **MINIMUM REQUIRED INFORMATION**

#### **General Information:**

1. Name of inspection agency
2. Name or identification number of inspector
3. Name of treating company
4. Location of treating company
5. Applicable product specification or standard (**NOTE:** The material shall be inspected according to Iowa DOT Specifications and it shall be stated in the inspection report.)
6. Charge number(s) inspected
7. Date of treatment
8. Type of material
9. Number of pieces by size
10. Species
11. Degree of seasoning:  
  
Moisture content prior to treatment: provided by Quality Control records from the treatment plant.
12. Processing (incised, rough surfaced, etc.)

- ### After Treatment Inspection

- ### Number of Pieces Rejected and the reason for rejection

In addition, each inspection report shall include the following certification statement:

Inspection Agency Name \_\_\_\_\_

Signed by: \_\_\_\_\_
